author1@email.com, author2@email.com, author3@email.com

ABSTRACT

This document provides some minimal guidelines (and requirements) for writing a research paper. Issues related to the contents, originality, contributions, organization, bibliographic information, and writing style are briefly covered. Evaluation criteria and due dates for the research paper are also provided.

Keywords: Research Paper, Technical Writing, Science and Technology

I. INTRODUCTION

This document is a template. An electronic copy can be downloaded from the International Journal website. For questions on paper guidelines, please contact the conference publications committee as indicated on the IJARC website. Information about final paper submission is available from the IJARC website.

One of the requirements of the graduate Science, Engineering and Technology courses is that you conduct research and write a research paper on some aspects of software engineering. The paper may present original work, discuss a new technique, provide a survey and evaluation of recent work in a given area, or give comprehensive and taxonomic tutorial information. The paper must emphasize concepts and the underlying principles and should provide authentic contribution to knowledge. If your paper does not represent original work, it should have educational value by presenting a fresh perspective or a synthesis of existing knowledge. The purpose of this document is to provide you with some guidelines. You are, however, encouraged to consult additional resources that assist you in writing a professional technical paper.

Before submitting your final paper, check that the format conforms to this template. Specifically, check the appearance of the title and author block, the appearance of section headings, document margins, column width, column spacing and other features.

The organization of this document is as follows. In Section 2 (**Methods and Material**), I'll give detail of any modifications to equipment or equipment constructed specifically for the study and, if pertinent, provide illustrations of the modifications. In Section 3 (**Result and Discussion**), present your research findings and your analysis of those findings. Discussed in Section 4 (**Conclusion**) a conclusion is the last part of something, its end or result.

II. METHODS AND MATERIAL

An easy way to comply with the conference paper formatting requirements is to use this document as a template and simply type your text into it.

A. Page Layout

The margins must be set as follows:

- Top = 1.7cm
- Bottom = 1.7cm

- Left = 1.7cm
- Right = 1.7cm

Your paper must be in two column format with a space of 1.27 cm between columns.

III. RESULTS AND DISCUSSION

All paragraphs must be indented. All paragraphs must be justified, i.e. both left justified and right-justified.

A. Text Font of Entire Document

The entire document should be in Times New Roman or Times font. Type 3 fonts must not be used. Other font types may be used if needed for special purposes.

Recommended font sizes are shown in Table 1.

B. Title and Author Details

Title must be in 12 pt Times New Roman font. Author name must be in 11 pt Regular font. Author affiliation must be in 10 pt Italic. Email address must be in 9 pt Courier Regular font.

TABLE I
SAMPLE FONT AND STYLE GUIDE

Element	Recommended Style	Size
Title	Times New Roman, centered	24 pt
Author names	Times New Roman, centered	11 pt
Affiliation	Times New Roman, italic	10 pt
Abstract / Keywords	Times New Roman	9 pt
Body text	Times New Roman, justified	10 pt
Captions / References	Times New Roman	8 pt

C. Figures and Tables

Place figures and tables at the places where they needed. All tables should be in Classic 1 format with

borders to heading and subheading columns. Large figures and tables may span across both columns. To do so select text above one column table and convert it in two column and then select text below one column table and convert it into two column. Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation “Fig. 1”, even at the beginning of a sentence. We suggest that you use border for graphic (ideally 300 dpi), with all fonts embedded) and try to reduce the size of figure to be adjust in one column. Figure and Table Labels: Use 8 point Times New Roman for Figure and Table labels. Use words rather than symbols or abbreviations when writing Figure axis labels to avoid confusing the reader.

Figure 1. A sample line graph using colours, which contrast, well both on screen and on a black-and-white hardcopy

D. Page Numbers, Headers and Footers

Page numbers, headers and footers must not be used.

E. Links and Bookmarks

All hypertext links and section bookmarks will be removed from papers during the processing of papers for publication. If you need to refer to an Internet email address or URL in your paper, you must type out the address or URL fully in Regular font.

IV. CONCLUSION

Although a conclusion may review the main points of the paper, do not replicate the abstract as the conclusion. A conclusion might elaborate on the importance of the work or suggest applications and extensions. Authors are strongly encouraged not to call out multiple figures or tables in the conclusion these should be referenced in the body of the paper.
